

CAB 13457
COPY 1 OF 4

18 February 1957

Dear George:

25X1 Would you get for me a status report in your developments
of a superhetrodyne receiver for the high end of system four.
25X1 I have heard [] speak of it and our users are anxious
to have it as a later modification to their equipment. I
believe it is a [] development -- [] says you have
not given him a requirement for such a set. I am not sure of the
amount of interchange of information you have on []
developments.

25X1

Also, will you let me know more of the [] pre-amplifier,
you told me you are buying six (6), I believe, and asked me to
underwrite the development to the extent of saying we wanted it
in the event that you phased out before its completion. We do
have a request from our users for ten (10) amplifiers. Would
you clarify these points - If you do not phase out, can we have
any of those you have ordered? Is your order purely experimental
or has the item been demonstrated? If you are ordering for
operation, when is the proper time for us to order additional
units to make for ourselves a total of ten (10)? Is another
Air Force organization engaged in this procurement, which?

Sincerely,

25X1
